

User Profile - CFG and test case

*For CFG it is assumed that the user already clicked on the “Account” link and not all the code will be next to each node (too many lines)

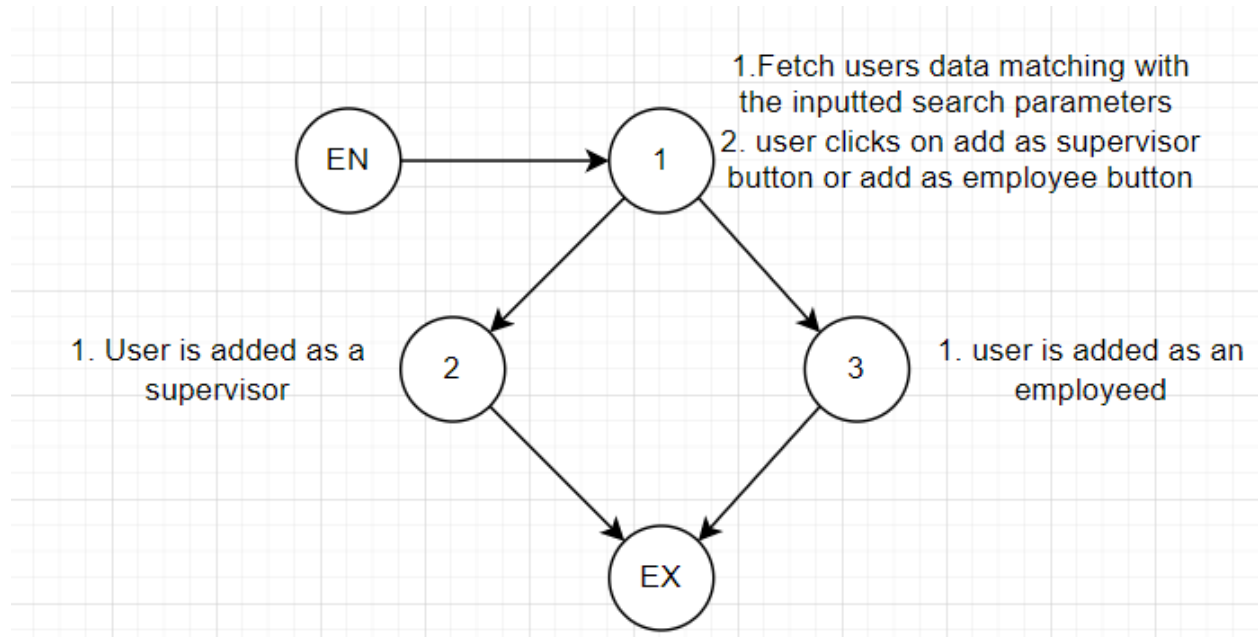

Tested requirement	User can see their profile and everything tied to it
Quick Description	When the user views their profile they can see their personal information, a list of their supervisors, employees and all the orders they currently have open.
Prerequisite	The user must be signed in to view their profile
Input	Click on the account link in the top navigation bar.
Expected output	<p>The user expects to see:</p> <ul style="list-style-type: none"> • Their personal information • Options to modify their information and password • A list of their supervisors (or a message indicating that they do not have any supervisors) • A list of their employees (or a message indicating that they do not have any employees) • A list of their orders (or a message indicating that they do not have any orders)
Observed output	<p>The user sees:</p> <ul style="list-style-type: none"> • Their personal information • Options to modify their information and password • A list of their supervisors (or a message indicating that they do not have any supervisors) • A list of their employees (or a message indicating that they do not have any employees) • A list of their orders (or a message indicating that they do not have any orders)
Verdict	Pass
Comments	N/A

Search - CFG and test case

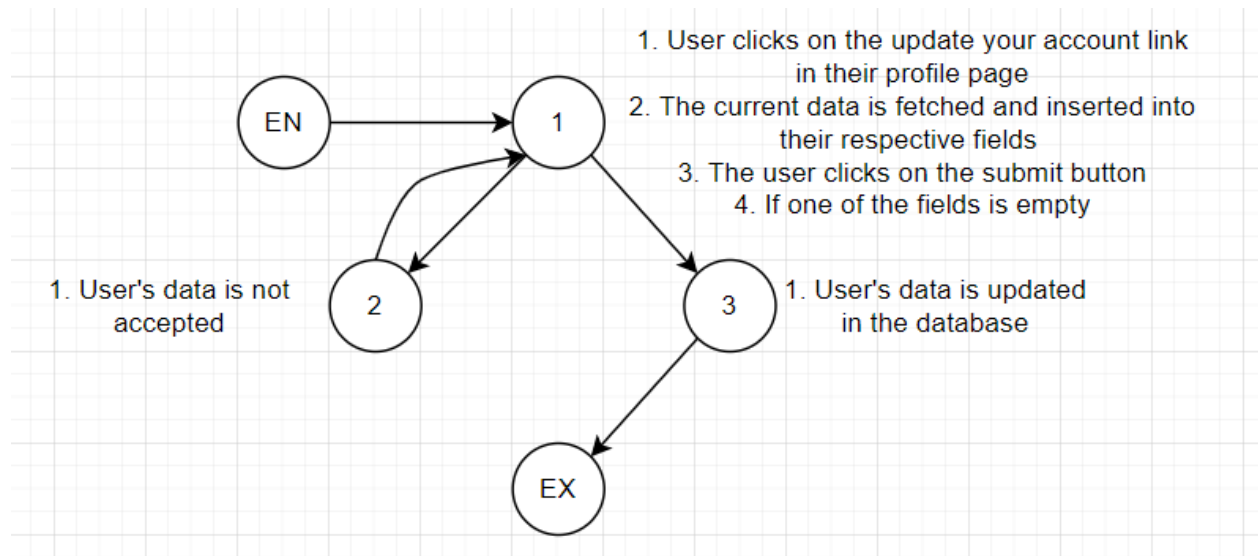

Tested requirement	Search for another user
Quick Description	A user can search for another user by their first name, last name and email address
Prerequisite	Being signed in and on the profile page
Input	Another user's first/last name or email
Expected output	Expected to observe a list of all users that have similar first/last names or email and if no relationship is established the possibility to add relationship with a user else a message informing that a relationship already exists.
Observed output	A list of all users that have similar first/last names or email and if no relationship is established the possibility to add relationship with a user else a message informing that a relationship already exists.
Verdict	Pass
Comments	N/A

Add relationship - CFG and test case

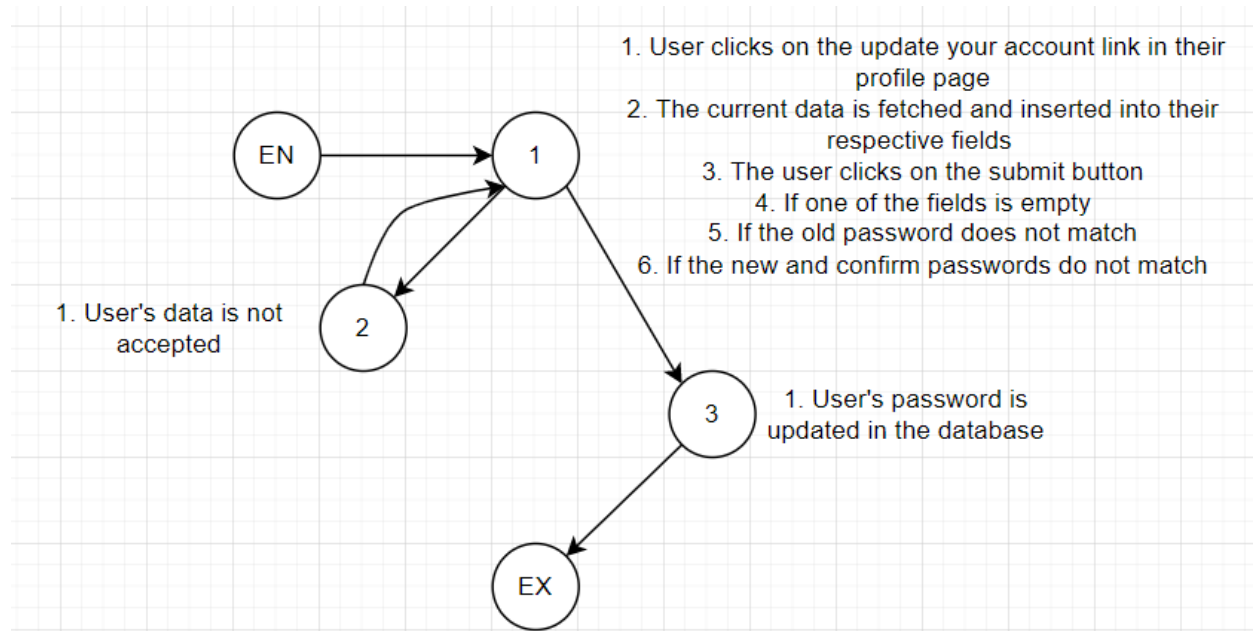

Tested requirement	Adding a relationship between two users
Quick Description	A user can form a relationship (supervisor/employee) with another user
Prerequisite	The user must be signed in and have searched another user
Input	User clicks a button to form a relationship
Expected output	Second user is added as the selected relationship
Observed output	Second user is added as the selected relationship
Verdict	Pass
Comments	N/A

Modify user information - CFG and test case

Tested requirement	User modifies personal information
Quick Description	A user can modify their first and last name
Prerequisite	User needs to be signed in and on their profile page
Input	New first and last name
Expected output	First and last names are updated
Observed output	First and last names are updated
Verdict	Pass
Comments	N/A

Modify user password - CFG and test case

Tested requirement	User can modify their password
Quick Description	A user can modify their password by entering their old password and their new password twice
Prerequisite	A user needs to be signed in and in their profile page
Input	Old password, new password, confirm new password
Expected output	The user's password is updated
Observed output	The user's password is updated
Verdict	Pass
Comments	N/A
